Authorized as Second Class Mail. Post Office Department, Ottawa  
ACME, ALBERTA, THURSDAY OCTOBER 4th, 1956

\$1.50 a Year; 5c a Copy

One of our pioneer citizens celebrated his 75th birthday on Saturday, Sept. 27th. C. H. Nash now retired from business but still very active. He makes daily visits to the store.

Mrs. M. Atkinson of Devon, formerly of Carbon, was a Carbon visitor this week. Nice to see you, Grandma Atkinson.

Hospital patients this week are Bill Douglas, August De Becker in the Drumheller hospital; Mrs. Hilda Goucher in the Three Hills hospital.

## HERMONSON—SMITH

A very quiet wedding was solemnized in Knox United Church Saturday, Aug. 25th at 7:30 p.m. when Lyla Smith of Drumheller was united in marriage to Henry Isaac Hermonson, son of Mr. and Mrs. Ole Hermonson of Carbon. Rev. Cyril E. Martin officiated.

Mr. and Mrs. Hermonson will reside at Entice where Henry is employed on the C.P.R.

The Home and School held its regular monthly meeting on Thursday, Oct. 4th with Pres. Mrs. Sam Garrett in the chair. The meeting opened in the usual manner. A motion was made and carried that a membership drive be held in order to get all the parents interested in the

welfare of their children. Presentation was then made by the I.O.D.E. Educational Secretary Mrs. Ed Ohlhauser who was introduced by the Pres. of the I.O.D.E. Mrs. Ben Fox, to the pupils with highest standing in Grades 9 and 12. A beautiful silver cup was presented to Gail Schmierer for Grade 9, and Leona Rempfer was presented with a cheque and certificate for Grade 12. Congratulations, girls. The parents were then taken on a tour of the different rooms and each teacher outlined the work of each grade for the year. The teachers requested that parents do all they can to co-operate and help the teachers all they can. The pro-

gram convenor, Mrs. Sally Ohlhauser thanked the teachers and

all who took part for their part

It takes  
money to  
make good  
gasoline

Gasoline quality has risen tremendously in the past few years. Two gallons of today's gasoline do the work of three in the '20s.

Finding new techniques to make these improved gasolines, and new equipment to put these techniques to work, has cost a lot of money.

Imperial, with by far Canada's most extensive oil research facilities, has spent 20 million dollars over the past ten years on research alone.

Imperial spent 65 million in the same period directly on new equipment to improve gasoline quality.

It's costing more and more money to make the gasolines required by today's more powerful cars.

### Heirloom quilt

7010

by Alice Brooks

An old-fashioned nosegay formed by scraps of many different fabrics. Fascinating to do — and just think of the lovely heirloom quilt you'll have when finished!

Pattern 7010: Pattern, charts, directions for scrap-quilt; in single and double-bed sizes.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Household Arts Department,  
Department P.P.L.,  
60 Front Street W., Toronto.

Two FREE patterns—printed in the new Alice Brooks Needlecraft book for 1956! Stunning designs for yourself, for your home—just for you, our readers! Dozens of other designs to order—all easy, fascinating hand-work! Send 25 cents for your copy of this wonderful book right away!

NEW PRINTED PATTERN  
EASIER—FASTER  
MORE ACCURATE

4598

36-50

### PRINTED PATTERN

A PRINTED PATTERN—makes sewing a pleasure! See how little time it takes to make this shirt-waist dress! Step-in classic designed especially to flatter the larger figure; smart in all three sleeve versions—any season!

Printed Pattern 4598: Women's Sizes 36, 38, 40, 42, 44, 46, 48, 50. Size 36 takes 4 yards 35-inch. Directions printed on each tissue pattern part. Easy-to-use, accurate, assures perfect fit.

Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept.,  
Department P.P.L.,  
60 Front Street W., Toronto.  
Be sure to write plainly your Name, Address and Pattern Number.

## IN THE HOME WORKSHOP

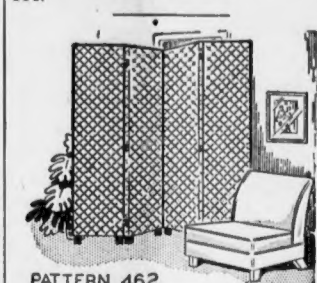

### Covered wagon mail box

The covered wagon design for rural routes may be adapted to any size mail box of the type shown in the sketch by making the platform fit the bottom of the mail box. The oxen and both sizes

TWO DESIGNS FOR MAIL BOXES  
PATTERN 238

of wheels are traced onto the wood directly from the pattern. The small letter box with bird cut-out on the door and arms for holding periodicals is for home where the postman rings twice. Tracing diagrams for all saw lines and painting outlines for both boxes are on pattern 238. Copies of this pattern are available to readers sending 35c with name and add 35c.

PATTERN 462

A well-placed screen is the answer to many problems. You can make a handsome one of almost any size for very little. Pattern 462 shows every step for making four different types to match your decorating scheme. It will be mailed for 35c. This pattern is one of five included in the packet of Decorator Projects from the Homeworkshop. The packet price is \$1.50.

Address order to:  
Home Workshop Patterns,  
Department P.P.L.,  
4433 West 5th Avenue,  
Vancouver, B.C.

## New radioactive finds reported

One of the geological survey parties of the Department of Mineral Resources, working in the Precambrian part of Saskatchewan, reports the finding of a number of radioactive pegmatites on islands in Manawan Lake.

The main zone of pegmatites lies 10 miles south of the junction of the Reindeer and Churchill Rivers, and 85 miles ENE of the settlement of La Ronge. The radioactive pegmatites occur in a zone five miles long and a half mile wide. Four surface samples, assayed radiometrically by the Geological Survey of Canada, Ottawa, ran .16, .073, .086, and .063 percent U3O8 respectively.

Geological sketch maps of the

## World salt production

Canada is second to the United States in the Western Hemisphere in salt production, but Canadian output is exceeded by wide margins by that of France, West Germany, Italy, Poland, Soviet Russia, Spain, China and India. Total world output in 1954 was estimated at 63,400,000 short tons.

area on a scale of one-half mile to one inch, showing the location of 14 radioactive occurrences, are available at 10 cents each from the Mineral Resources Department Mining Recording Offices at Regina, Prince Albert, Elin Flon, La Ronge and Uranium City. At the time of this news release, no mineral claims were registered on these mineral occurrences.

COURTESY PAYS OFF

## Delectable!

Downright delectable...these flavorful Cheese Puffs, fresh and fragrant from the oven.

Made with Fleischmann's Active Dry Yeast, they're a cinch to prepare. Next time you bake at home, bake a batch of these delicious cheese treats!

## Cheese Puffs

1. Scald  $\frac{3}{4}$  cup milk  
Stir in  
1 tablespoon granulated sugar  
1 teaspoon salt  
 $\frac{1}{4}$  cup shortening  
Cool to lukewarm.

Stir in lukewarm milk mixture and

- 1 cup shredded old cheddar cheese  
2 cups once-sifted all-purpose flour  
 $\frac{1}{2}$  teaspoon celery seeds

and beat well—about 2 minutes. Scrape down sides of bowl. Cover with a damp cloth. Let rise in warm place, free from draft, until doubled in bulk—about 50 minutes.

2. Meantime, measure into bowl  
 $\frac{1}{2}$  cup lukewarm water  
Stir in  
1 teaspoon granulated sugar

3. Beat down batter. Spoon into 12 greased average-sized muffin pans. Bake in a hot oven, 400°, about 25 minutes.

Yield—12 puffs.

Needs no refrigeration

## \$10,000 Grant regional libraries

The Manitoba government is stepping up its campaign to encourage establishment of regional libraries throughout the province. There are no regional libraries now in Manitoba.

Starting with legislation a few months ago that provides a \$10,000 grant on formation of a regional library, together with a maintenance grant of \$400 per year for each participating municipality, the drive for regional libraries continued with promotional addresses during the past few months by Miss Marjorie Morley, Provincial librarian and director of library services.

In each region there would be a central library where books and periodicals would be ordered for the whole area. These would then be distributed to branches and deposit stations. As the books would be exchanged frequently, it would give readers access to "thousands of books" in the course of a few years.

Apart from government financial support, municipalities are allowed to levy up to one mill for regional library costs. Two or more municipalities can comprise a "region" for library purposes, and votes can be held on petition of eight percent or more of the electorate. To establish a regional library, there must be a majority of electors in each participating municipality.

## Do FALSE TEETH Rock, Slide or Slip?

FASTTEETH, an improved powder to be sprinkled on upper or lower plates, holds false teeth more firmly in place. Do not slide, slip or rock. No gummy, gooey, pasty taste or feeling. FASTTEETH is alkaline (non-acid). Does not sour. Checks "plate odor" (denture breath). Get FASTTEETH at any drug counter.

## WEEKLY BIBLE COMMENT

### INTERPRETIVE TASK EARLY CHRISTIANS HAD DIFFICULT

The early Christian writers had the task of explaining the Christian faith in relation to the religion in which many of the disciples had been brought up. In the thoughts of Paul and other Christian writers, there was no breach between Judaism and Christianity.

They thought of their Christian experience as a fulfillment of the faith and practice to which they had been accustomed.

Deep in this former faith and practice had been the emphasis upon blood sacrifice. It was part of the Jewish ritual. In common with almost all religions, the conception of blood sacrifice and blood covenant played an essential part.

Then came the sacrifice of Christ upon the cross, and the Christian teaching relating this sacrifice to the Jewish ritual and practice. This, in the Christian thought, marked a new covenant.

The salvation of men was no longer to be won by the shedding of the blood of sacrificial animals. Salvation was rather through the sacrifice of Christ.

This is a lesson of mystery which it is not easy either to understand or to explain.

A great theologian has said, "What Christ is on the cross, God eternally is."

The idea of Christianity and of the New Testament is that for our salvation no sacrifice is needed but that of a sincere and contrite heart.

God is not to be appeased. He is Himself through Christ the appeaser, inviting us to receive His grace and accept the sacrifice made through love.

## "Corn Starch Makes Smoother Sauces!"

### WELSH RAREBIT

- 2 tablespoons butter
- $1\frac{1}{2}$  tablespoons BENSON'S or CANADA Corn Starch
- $1\frac{1}{2}$  cups milk
- $1\frac{1}{4}$  cups grated sharp cheese
- $\frac{1}{2}$  teaspoon salt
- $\frac{1}{8}$  teaspoon pepper
- $\frac{1}{8}$  teaspoon paprika
- Dash cayenne (optional)
- $\frac{1}{2}$  teaspoon dry mustard
- 1 tablespoon chopped parsley

MELT butter in top of double boiler. BLEND in BENSON'S or CANADA Corn Starch; place over boiling water. MIX in milk gradually; stir until sauce has thickened. COVER and cook 10 minutes, stirring occasionally. ADD grated cheese and stir until melted. ADD seasonings and parsley. SERVE hot on buttered toast or on heated, crisp soda crackers.

YIELD: 4 to 6 servings.  
Tomato Rarebit: ADD  $\frac{1}{2}$  to  $\frac{3}{4}$  cup cooked tomatoes to above recipe.

## Utilization of late season alfalfa growth

In many parts of Canada only one cutting of alfalfa hay is harvested. A second cutting may be produced by August or early September but it is not advisable to harvest it, says J. E. R. Green-shields, Forage Crops Laboratory, Saskatoon, Sask. At this time the alfalfa plant is storing reserves in its root system and cutting will force new growth so that the plant will go into winter in a weakened condition. However, if cutting is delayed until late September or early October the crop can be safely harvested. The root reserves have been stored and little or no re-growth will start before winter sets in.

This late cutting is a valuable feed. Analysis at Saskatoon have shown 19 percent protein in late-cut alfalfa. Unfortunately, cool weather and a high moisture content in the crop make it difficult to cure as hay, as artificial driers are seldom available. The best use is as a grass silage. If it is stored as silage, 150-200 pounds of ground oats or barley should be mixed in when the crop is ensiled. The added grain reduces the high moisture content of the alfalfa. It also adds carbohydrates and thus allows better use of the high protein content of the crop. Finally, the grain acts as a preservative to make a better quality silage.

## Helpful Hints

Keep unripened bananas in a brown paper bag overnight. If at room temperature, fruit will be ready for use the next morning.

A generous pinch of baking soda together with salt, placed in pan with green vegetables, such as beans, broccoli or asparagus, maintains the green color of vegetable after cooking and no yellowish tint appears.

Buy freshly ground meat and store it, lightly covered with waxed paper, in the coldest part of your refrigerator. Use it within two days after buying. If you want to have it especially ground, buy a chunk of round or shank.

Oyster casino—An easily prepared oyster dish and one that is a favorite with many people is oyster casino. Drain 1 pint oysters and arrange them on greased, oven-proof platter. Sprinkle with ½ cup finely minced green pepper, ½ cup finely minced, crisp-cooked bacon, 1 tbsp. lemon juice and pepper to taste. Bake in a 450 deg. F. oven for 10 minutes. Serve very hot.

Hamburger has taken first place as the out-door cooking food during the past few years. There are dozen of ways to prepare it and each way has its own ardent champions. If you're serving hamburgers at table, try this added touch for better flavor. When hamburgers are cooked remove from pan. Add to pan 1 tbsp. butter, 1 tbsp. Worcestershire sauce or catsup. Stir. Pour over hot hamburgers.

## ON THE WAY OUT

Every year, statistics show fewer deaths from tuberculosis in Canada but we shall not be able to boast until, as with small pox, the disease has been wiped out entirely. This can be done by the efforts of every Canadian performing a simple, painless and cost-free duty about once a year. When one hundred percent of the population has its annual chest X-ray, then it is reasonable to expect that tuberculosis will be really on its way out. When every incipient case has been discovered—through the X-ray examination—and treated, successfully, the disease should die a natural death.

## DICTIONARY

Democracy: A government of the people, by the people, and for the people that finds it hard to get along with the people.

# Now They're Back at School Holidays Just a Memory

Over 3 million kids across Canada will be returning to school this week with their thoughts turned longingly back to summer vacations. Many will have tall tales to tell and some of the fanciest yarns will be told by

the lucky group above who spent their holidays at "Pony Pastures" in beautiful Glenora, B.C. for this riding camp comes mighty close to a kid's vision of paradise.

The antics of this toy-sized Shetland pony and the sweet fragrance of clover-studded grass will linger on and on

until once again the threat of science and maths exams takes a giant-sized hold on the imagination.

The good old days . . . when a fella could sit on a fence and watch the others work if he'd a mind to.

School on horseback might be fun . . . Oh well, there's always next summer and memory will last until then.

## HUMAN FUEL

Every year, many Canadians lose their lives in fires and children are frequently victims of this terrible death. There are many causes of fires in homes and all too frequently these are matters of carelessness on someone's part. Starting fire in the stove with

coal oil is an old cause of a flare-up; keeping oily rags in a closed place is another. For an amateur to attempt to install electrical wiring is an invitation to trouble. Only a qualified electrician should do this job. Purchasers of electrical equipment should look for the CAS ticket that is the government seal of approval.

## POPULATION

First release of preliminary population figures of the 1956 Census, covering 492 smaller cities, towns and villages, indicate a marked rise since 1951 in urban population. Out of 31 cities and towns listed with population of 5,000 and over, all but three had gains, most of them substantial,

while of the others all but 87 (mainly small villages) also had population gains.

## SYNTHETIC COFFEE

A Netherlands industrialist, A. Van Driel, has perfected a synthetic coffee which is said to duplicate perfectly the flavor and aroma of brew made from the coffee bean.

By Lloyd Percival

## Try the "sweater trick" for extra points

The point-after-touchdown and field goal specialist is a big scoring threat on any football team. Almost invariably, you find him up at the top of the scoring race, and frequently his accuracy decides the outcome of a close game.

One of the most important things the placement kicker must learn to do is keep his head down and his eye on the ball. There are two reasons. First, he must watch the ball to make sure that his foot connects with the right spot. And second, to look up and at the charging defensive linemen almost always rattles the kicker and causes him to miss.

Lou Groza of the Cleveland Browns, one of the great field goal kickers of all time, used a special trick to make himself keep his head down while he was learning his art. Groza used to hold the neck of his sweater between his teeth while he practised. In this way, he had to keep his head down, and after a great deal of practise he found that the head-down position had become automatic.

So if you're the point-after-touchdown specialist on your team—or you would like to be—why not try Groza's stunt? It will more than pay off in accuracy.

## Don't let stiffness stop you

Something that discourages many people who have started on a fitness campaign is the stiff, aching muscles you get a day or two after you have started exercising. It's a very natural reaction, but it has the unfortunate effect of causing many people to give up their program and forget about their fitness ambitions.

There are two things to remember. First, many people start their exercising too enthusiastically. They let their exuberance and ambition carry them away. The result, naturally, is stiffness. So be sure to start slowly—do only a few mild exercises the first day, building up gradually over a few weeks. That's the best way to avoid stiffness and keep your enthusiasm high at the same time.

The second thing to remember

is that if you do become stiff, the best medicine is the hair of the dog that bit you. Repeat the exercises that caused the stiffness because by doing this your muscles quickly become adjusted to them and a lot of the soreness will be eliminated quickly.

If the aches and pains are particularly bothersome, a couple of hot baths will help a great deal, too.

The Canadian Amateur Sports and Physical Fitness Development Service is a nationwide project operated by Sports College to improve standards of sports and physical fitness. This newspaper is pleased to participate in this service by presenting "The Sports Clinic". Further information about CASPFS may be obtained by writing to Sports College, Box 99, Toronto 1.

## New school film manual issued

A new manual, listing and describing films for school use, has recently been mailed out to some 3,500 classrooms throughout the province.

E. F. Holliday, supervisor of visual education for Saskatchewan, said that the manual is designed to assist teachers in making the most effective use of the facilities of the visual education branch. The aim is to provide one manual for each classroom of the 616 schools which are equipped to use visual aids.

The current "Manual of Audio-Visual Aids for Saskatchewan Schools" will be used for the next five years. It can be kept up to date by the teachers themselves by simply attaching listings of new films to the binder-type manual as supplied by the branch.

Titles of 1,686 films are already listed in the manual, Mr. Holliday said. The last manual was issued in 1953.

All films listed and described in the manual are the 16 mm. sound variety, some colored, others black and white.

Antrophobia is the fear of society.

## Increased farm help expected

An increased flow of eastern harvest help to the west is expected as a result of Ontario's move to ease restrictions on movement of farm workers. At the same time, Manitoba authorities were awaiting reply from Ottawa for a request for "any available" servicemen to help relieve the shortage of harvesters.

These were the latest developments in the farm help picture, outlined by H. R. Richardson, director of the province's farm labor service.

He reported that during the past

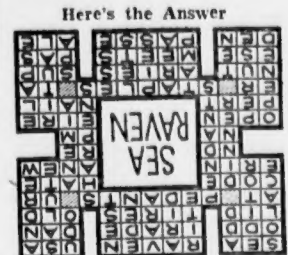

week there had been no westward movement of harvest excursionists from the east: Manitoba's figure of eastern harvest help still stood at 15 out of a requested 700. However, Ontario which had clamped down on recruitment of her farm help for the west until her own harvesting was nearing completion, now was beginning to ease these restrictions, explained Mr. Richardson.

In any case, rains throughout Manitoba's agricultural belt had reduced temporarily the farm help demand, he said. Mr. Richardson reported a few soldiers during the week had responded to printed notices at military camps telling servicemen going on annual leave that farm help vacancies existed.

# Continent's worst growing pains felt by Mexico's capital city

By EMIL ZUBRYN  
MEXICO CITY, Mexico. — This metropolis is experiencing acute "growing pains" that have city authorities scratching their heads in bewilderment.

The latest official count has shown that the population of the

Distrito Federal, embracing the city and its suburban environs, is 4,005,175, and still growing.

Density of population throughout the republic is 15 persons per square kilometre (about 5% of a square mile) while in the city it is 180 times higher, or a total of

2,700 persons per square kilometre.

The population already has gone one million higher than the capacity of public utilities. Apart from the problems of a "sinking city" as the city's subsoil continues to settle, the city fathers now find municipal services taxed to the limit, and the situation becoming graver and graver.

The army of rural dwellers continues to descend in ever-increasing numbers on the over-burdened city. Recent statistics show that there are only 53.5 percent original dwellers of the city; the rest are newcomers from all over the republic.

"How are we going to keep them down on the farm?" is the sad, sad theme song of city and federal officials.

Major reason for the "flight" from the farms is "unproductivity" and unprofitable operations. The administration is waging a huge, all-out campaign to win farmers over to crop rotation, use of fertilizers and other modern methods.

This, however, is something that will take years to accomplish. In the meantime, the eroding earth rebels and refuses to yield. So the campesinos (farmers) flock to the cities, and especially to the capital.

This abandonment of the farms is leading to a grave labor problem, too. There is, for example, an over-abundant supply of day labor in the city—and already big farm operators are feeling the pinch in the lack of migrant labor when harvesting times rolls around.

The human tide that flows into Mexico City also is augmented by braceros (migrant field workers) whose dream is to find work in the "land of dollars and plenty."

So far, the city administration has been unable to cope with its unwelcome guests nor has it been able to discourage the lean and hungry citizens flocking to its environs in the search for work, shelter and food. Shanty towns, instead of disappearing, are mushrooming out, and squatters build new "lost villages" of cardboard, tin and wood wherever they can.

With a population now racing toward the five million mark, this city is marked by shortages: of food, shortages of power, water and other public services; buses are jammed, streets are jammed, and the future does not look any too bright.

The sounds of hammers, drills, saws, riveting, etc., are heard around the clock as the sprawling city sends out even more tentacles into the suburbs. Ruthlessly, all the ancient colonial structures are disappearing for more modern housing, stores, offices, etc.

What tomorrow will bring no one knows nor apparently cares. Some alarmed civic leaders and architects are trying to seek a solution to stem the tide of humanity, and stabilize the size of the city, even decrease it.

There has been talk of syphoning off the excess population, and channelling new migrations to such cities as Monterrey, Guadalajara, Puebla and Oaxaca. Nothing concrete has been worked out, however, and these cities look askance on any new citizen for they, too, are not geared to give public services to increasing numbers.

## Christie leaves forestry service

Charles Roy Christie, 59, who had become known as the "Grand Old Man of Forestry" in Saskatchewan, retired as senior forester of the provincial natural resources department's forestry branch on August 31.

His retirement, due to ill-health, brought to an end a career as a Saskatchewan forester, which lasted 37 years and three months—the longest, in point of service, of any resources department employee.

He was regarded by fellow department workers as a good administrator and admired for his forthrightness and ability to make decisions quickly.

His guiding hand was felt in many of the policies and programs inaugurated over the years, which led to much wider utilization of forest materials in Saskatchewan.

He was instrumental in setting up the technical services divisions of the forestry branch, a task begun early in 1947, and for working out a white spruce cutting quota enabling the forestry branch to maintain a sustained yield policy for Saskatchewan's saw timber industry.

## Funny and Otherwise

Doctor: "Your husband has to have absolute quiet. Here is some sleeping powder."

Wife: "How much do I give him, and when?"

Doctor: "You don't give it to him; you take it yourself."

She was wearing the latest thing in a strapless gown, and the good-looking fellow across the dance floor approached her. "May I join you?" he asked.

Good Heavens," she cried, "am I coming apart again?"

The traveller rushed up to the station window and gasped, "Give me a round-trip ticket, quick."

"Where to?" asked the agent.

"Back here, you dope."

A bicycle salesman was expecting a happy event in his family, so before leaving he instructed the nurse in charge to send a wire: "Gent's model arrived." If a boy; and, "Lady's model," if a girl.

He got the wire: "Tandem".

Joe: "There's two things we're sure of: Death and Taxes".

Moe: "Yeah, but one thing about death, it doesn't get worse every time the council meets."

"The patient in 43 keeps asking for his wife, doctor?"

"Still delirious, eh?"

A great financier is one who feeds, clothes, educates and decently raises a large family on a small income.

A man can tell he is growing old when he enjoys the feeling that he is neglected.

The girls who look good in bathing suits, usually have figures to prove it.

## Softwoods and hardwoods

Softwoods accounted for an estimated 94.1 percent of the lumber sawn in Canada during 1954 and hardwoods for 5.9 percent. Among the provinces, British Columbia had the highest proportion of softwoods at almost 100 percent; Quebec with 19.9 percent, Ontario with 19.8 percent and Saskatchewan with 17.4 percent, the largest proportion of hardwoods.

## CIGARETTES

Factory shipments of cigarettes by Canadian manufacturers in 1955 totalled 24,864,332,000 with a factory selling value (including excise duties and taxes) of \$332,011,517, accounting for nearly 80 percent of the total value of shipments of all tobacco products.

## Caution urged in handling firearms

E. L. Paynter, Saskatchewan Game Commissioner, issued a plea to hunters to handle firearms cautiously during the 1956 hunting season. Many of the new seasons will open early in September.

"We have already had nine gun accidents in Saskatchewan this year," said Mr. Paynter, "and one of these was fatal. We would like to impress upon everyone that a firearm is not a toy and each one must be treated with the greatest respect."

During 1954 Saskatchewan recorded 38 gun accidents, 14 of them fatal and during 1955 there were 37, of which nine were fatal.

"Young people as a group are the worst offenders," said the Commissioner. "During 1955, 16 of the accidents were caused by youths 17 years old or younger. The only fatality recorded so far this year involved a youngster of nine years."

Saskatchewan annually licences approximately 65,000 hunters and although hunting is done in the fall and winter seasons, gun accidents are a year round occurrence.

During 1955, accidents with firearms were caused by a number of violations of safety rules circulated by the department. Six were caused by accidental discharge; two while crossing a fence; four were shot in mistake for game; seven were shot while in the line of fire; six were caused by having a loaded gun in a vehicle; four happened when the operator stumbled with a gun; three were caused while cleaning a gun; three were caused by children playing with a gun; and one each was caused by an insecure rest and by an unsafe gun.

"A pamphlet entitled, 'Saskatchewan Game Bird Synopsis' is being given each hunter with his licence," said Mr. Paynter, "and we would certainly appreciate it if each hunter studied the hints for safe hunting we have included in this bulletin. People must be cautious during this portion of their recreation."

## Unwanted guests

As the weather grows cooler, houseflies make more efforts to get into the house, where they may hibernate and, next spring, breed in their thousands. These insects are dangerous since they transmit diseases through germs collected during their travels. They may fly from garbage heaps and other filth straight to kitchen and dining room, unless prevented. Well screened windows and doors and generous use of insecticides will help to keep the house free of these pests.

## Canadian statistics report

(A Weekly Review)

**Industrial Production:** Preliminary figures put the composite index of industrial production at an all-time monthly peak in June and nearly 8 percent above June last year. Over the first six months the index averaged 7.7 percent higher than last year. The manufacturing component of the index was up 7.5 percent in June, just under 7 percent on the half-year average, durables continuing to lead in rate of gain. Gain in mineral production was only slightly above the overall industrial production rise in June as against the half-year rise of 15.5 percent.

**Labour:** Labour income reached new high levels in June and the first half of this year, more than half of the six-month rise being attributable to employment increases. The month and half-year gain was spread through all major industrial divisions.

**Agriculture:** Estimated milk production in July was 7 percent larger than last year after a small decline in June and a moderate rise in the total for the first half-year . . . Wheat ex-

ports in the first two weeks of the new crop year were slightly lower than last year.

**Manufacturing:** July and seven-month shipments were larger this year than last for mineral wool batts, hard board, asphalt and vinyl-asbestos floor tiles; gypsum products shipments were off slightly in the month, up sharply in seven months . . . Television-set sales rose in July after an earlier decline, while sales of radios fell after earlier gains . . . Cement shipments to the end of June were 21 percent larger than last year.

**Merchandising:** Estimated department store sales in the first half of this year were nearly 10 percent above last year, were still rising at the middle of August.

## Free apprenticeship classes starting soon

Saskatchewan apprenticeship training courses will begin next month at the Canadian Vocational Training School in Saskatoon, Labor Minister C. C. Williams announced recently.

Classes in the Motor Vehicle Mechanics Repair Trade will start Sept. 24 with other trades commencing classes in successive months. Classes in the Electrical Trade will commence Nov. 12, while those in the Plumbing, Sheet Metal Work, Carpentry and Brick-laying Trades, will start in January.

On Jan. 7, classes in the Welding and Auto Body Trades will begin at the Moose Jaw Technical school in Moose Jaw.

Due to the classes starting so soon it is extremely important that persons interested contact the Apprenticeship and Tradesmen's Qualifications Branch of the Labor Department immediately, Mr. Williams said.

"If prospective candidates are slow in applying it may make it necessary for them to wait another year before being able to take advantage of the specialized training available at the schools," he said.

Applicants for the courses must be 16 years old, must be working at the trade, must be indentured to an employer or, in special cases, to the Director of the Apprenticeship and Tradesmen's Qualifications Branch, and must be willing to attend all designated classes at the centre, keeping in mind that the training is free.

True cinnamon comes from Ceylon island.

## Industry and education

(From The Virden Empire, Virden, Manitoba—July 11, 1956)

Something is going to be done about education, apparently.

Education, in this instance, means particularly the training of engineers and technical personnel to help man the vast developments taking place in Canada and the growth expected in the coming years.

At present there is a definite shortage of such personnel—to the extent that it is threatening the well-being of the economy—and the situation threatens to become worse.

Apparently the something to be done won't be left entirely to traditional avenues.

At virtually every industrial gathering these days—and particularly at the recent conventions of the Engineering Institute of Canada and the Canadian Manufacturers' Association—the topic has overshadowed all other themes.

If what is being said means anything, then business and industry may be expected to take a greater responsibility in the educational field than ever before.

Many businesses have made contributions over the years in various ways, especially through scholarships. What they have been doing, however, has been far short of what is needed to meet today's situation.

Crawford Gordon Jr., president of A. V. Roe Canada Ltd., said at the CMA meeting:

"The income tax act provides that corporations may deduct up to five percent for gifts to charitable and educational institutions. In recent years the average has been less than one percent. In 1952 this amounted to about \$26,000,000. Of this, less than 11 percent—or just \$2,800,000—went for education.

"This is just a drop in the bucket when you consider that Canadian universities are talking about expansion of between \$250,000,000 and \$300,000,000 in the next ten years."

Mr. Gordon announced that a national conference on scientific and engineering manpower will be held September 10-11, with the blessing of the Dominion Council of the Associations of Professional Engineers and the support of business and industry.

## Sneed or life!

(From The Mall, Drumheller, Alberta—August 1, 1956)

Authorities have been quoted to the effect that in an automobile accident in which someone is injured chance of death at forty miles an hour is one in sixteen, at fifty-five miles an hour one in twelve, at sixty-five miles an hour one in six. This is just about what one would expect. And in view of the shocking increase in the number of fatal automobile accidents surely some attention should be paid to statistics of this character.

It would seem that the mad desire to get from place to place in a hurry is responsible for the fact that if there is not some constructive planning all of the splendid results of applied preventive medicine may be lost by increased accident rates. Speedways, high-powered cars capable of going faster than any human being needs to go and impatient human beings are creating a death toll which is not only tragic but unnecessary.

An obvious conclusion is that humans consider speed more important than life!

## PATENTS

AN OFFER TO EVERY INVENTOR. List of inventions and full information sent free. THE RAMSAY COMPANY, Registered Patent Attorneys, 273 Bank Street, Ottawa, Canada.

## Walking Weather

After the heat waves are over, the biting insects gone and sunshine a little less strong, the walker comes into his own. Autumn days in Canada are beautiful and just right for that best form of exercise—walking. Going places on one's own two feet gives a stimulating workout to mind and body. A person in normal health should take a daily walk. Even aged people who can get around should take a short stroll every day, weather permitting.

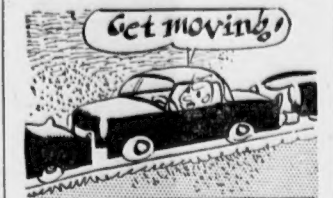

3212

## Strictly Fresh

The fellow who leaves work early two or three times a week needs help of an optometrist, not a doctor. The poor guy is clock-eyed.

Taking candy away from our baby is about as easy as separating a tigress from her young.

Take a few melon-headed drivers, add some nuts behind the wheel of several other autos, let

simmer at an intersection in mid-day sun. That's the recipe for a traffic jam.

Stretch-to-any-size socks cover a multitude of shins.

The horn of plenty is the one which the guy behind you has on his car.

## Placenames honor servicemen

Eleven lakes, two islands and two bays have been officially named after Saskatchewan servicemen who gave their lives during the Second World War. Hon. A. G. Kuziak, minister of natural resources, announced.

In many cases the address of relatives of the servicemen is unknown and it is hoped that relatives and friends will advise the Department of Natural Resources in Regina so that biographical particulars may be obtained. These are filed for the purpose of historical association of the men with the features named in their honor.

Ten place names were given to lakes and bays in the Foster Lake area, situated 100 miles north of La Ronge.

The Po river is Italy's longest river.

**ROMANCE ESPANOL**—Romantic as an old Spanish love story, Christian Dior's dramatic evening gown is a froth of delicately-etched black French chantilly lace over layers and layers of pink tulle. The strapless gown, with a big bell skirt that just grazes the ground, is worn with a wide black velvet sash and matching mantilla.

## Larger volume of oil delivered through pipe lines

Volume of oil delivered through Canadian pipe lines was up sharply in June and the first six months of this year as compared with a year earlier. Deliveries were 20,122,735 barrels in June versus 18,111,357 a year ago and 129,428,238 barrels in the January-June period versus 103,662,064.

Half-year deliveries were as follows by provinces: British Columbia, 19,901,962 barrels (13,354,047 a year earlier); Alberta, 8,120,674 (8,345,927); Saskatchewan, 8,351,982; Manitoba, 34,002,769 (23,228,643); Ontario, 21,416,926 (18,376,834); and Quebec, 37,633,925 (32,588,794).

## Increase noted in traffic accidents

To the end of July, a total of 4,783 motor vehicle accidents were reported in Saskatchewan, an increase of 620 over the same period in 1955.

A report issued by the provincial highway traffic board showed that during the first seven months of 1956, 51 persons met death on the highway, 1,522 were injured and property damage amounted to \$1,675,032.

This was an increase in all categories over last year, when 48 persons were killed, 1,082 were injured and property damage amounted to \$1,365,328.

The report also listed statistics for the month of July. They are as follows, with 1955 figures in brackets:

Number of accidents 895 (668); fatalities 13 (12); injured 425 (249); property damage \$369,355 (\$264,851).

During July, the most dangerous hours of the week for motor vehicle accidents were between 5:00 p.m. and 8:00 p.m., when 22 percent of the month's accidents took place. Almost 13 percent occurred between the hours of midnight and 4:00 a.m.

Sunday was the worst day of the week for accidents during July, followed by Saturday, Friday, Tuesday, Monday, Thursday and Wednesday.

## Key to the cause

The person who suffers a chain of colds in the winter might discover the cause by taking a survey of his diet. Little or no breakfast and a hit-or-miss lunch may probably be to blame. Building up resistance to colds by eating a good breakfast and a well planned lunch consisting of milk, vegetable or fruit, bread and protein food, those colds may be avoided this winter. It really pays to eat wisely.

## MY FAMILY LOVES THIS RASPBERRY Double-boiler Pudding!

Grease upper pan of double boiler generously. Measure into pan  
1 1/4 c. (10 oz. can) canned raspberries and syrup  
1/4 c. granulated sugar  
2 tps. corn starch  
Mix well and set aside.

Sift together  
1 1/4 c. once-sifted pastry flour  
or 1 1/2 c. once-sifted all-purpose flour  
1 1/2 tps. Magic Baking Powder  
1/4 tsp. salt  
Cream  
3 tps. shortening  
Blend in  
1/2 c. granulated sugar  
1 egg  
Combine  
1/2 c. milk  
1/4 tsp. vanilla  
1/2 tsp. grated lemon rind

Add dry ingredients to creamed mixture alternately with flavored milk, combining lightly after each addition. Turn into double-boiler over raspberries. Cover closely and cook over boiling water until batter is cooked—about 1 1/4 hours—add boiling water, if necessary, to under pan.

Turn hot pudding out onto a deep serving dish. Pass chilled custard sauce or pouring cream.  
Yield: 4 or 5 servings.

MAGIC protects all your ingredients. Get lighter, finer-textured results... buy MAGIC Baking Powder today.

## Carbon

Continued from front page in the evening's programme. Next meeting will be held the first Thursday in November. The meeting closed in the usual manner and a lovely lunch followed.

Several citizens motored to Wetaskiwin to attend the Edom and Halstead wedding on Wednesday, Oct. 3rd.

Will the party who was seen taking 1 pair hip rubber boots from C. H. Nash's house please return at once to avoid further trouble.

Jimmy Foster, now of Jasper, spent a few days at the home of his parents, Mr. and Mrs. Ed Foster.

Mrs. Levins, Mrs. Cadman, Mr. and Mrs. Roy Harris, all of Drumheller were visitors at the home of Mr. and Mrs. Chas. Cave.

ANNOUNCES THE EIGHTH ANNUAL

#### MASTER FARM FAMILY AWARD

FOR 1956 TO THE FOLLOWING

**Alfred George Rose** **John P. Rozmahel**  
RICINUS VIKING

**A. D. Fraser** **Wilfred L. McGillivray**  
TEEPEE CREEK COALDALE

The Master Farm Family Award is recognized by an award of \$1000.00, an Engraved Plaque and a Name Plate for the Farm Entrance. The purpose of the Master Farm program is to find and honour those who have achieved notable progress in farming, home-making and citizenship, and who, by their example, are encouraging interest in farming as a way of life. The Department of Agriculture is indeed proud and gratified with the high standard of attainment among the farm citizens of Alberta as revealed by the Master Farm Family Program.

CALGARY

Convenience and Comfort  
at Reasonable Rates

Mr. and Mrs. A. McLeod, Mrs. Dick Gimble, Vi Pattison, also Mrs. W. Permann and Mrs. Norman Nash were all Calgary visitors this week.

Don't forget the I.O.D.E. Dance Nov. 9th. Watch for posters.

James Stout was a Calgary visitor this week.

Mr. and Mrs. James Cooper of Banff were visiting on Tuesday and Wed. at the home of Mr. John Kaiser.

Mrs. C. Graham left Monday to visit at the home of her daughter and son-in-law Mr. and Mrs. Henry Jerome of Red Deer.

Mr. and Mrs. Flint and boys of Penhold were visitors at the home of their mother Mrs. E. MacAlpine.

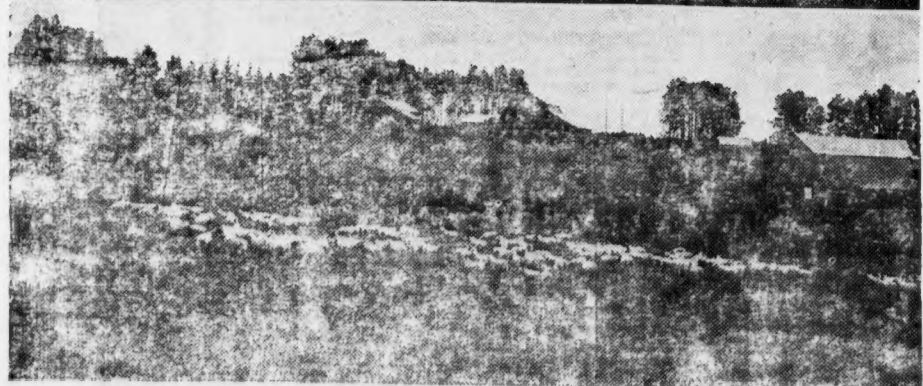

The first test of artificial insemination was done on the Stewart Hay farm this week when one heifer was served.

## Swalwell

BORN—To Mr. and Mrs. Berkeley Beeton, a daughter Oct. 2nd. Congratulations.

We are glad to hear the reports on Mr. Cliff Fyten are all good ones.

Mr. Hepper won the fish derby in Three Hills for the largest fish caught at Porky's Lagoon, a spinning reel and rod. Mrs. Hepper won the pool in the first world series game.

One of the Master Farm Families of Alberta named this week by Alberta Agriculture Minister the Hon. L. C. Halmrast, is the Alfred Rose family of Ricinus, near Rocky Mountain House. Specializing in sheep, with some cattle, the family has established a standard of farming equal with the best in the province. Top picture shows the family in a group shot. They include Mr. and Mrs. Alfred Rose and their three sons, James, Robert and Norman. Bottom picture shows a general view of the farmstead with house upper left. Also shown is a portion of the fine flock of sheep that is Mr. Rose's pride.
